

TIER STRUCTURE (REFINED)

BASIC SHOP PLAN

Structured, step-by-step diagnostics that eliminate guesswork and guide technicians through validated testing. Built for everyday repairs with consistent, foreman-level direction.

(\$99 / \$79 annual)

Enabled Capabilities

- Full diagnostic process engine (strict step control)
- Mechanical + basic electrical + OBD-II flow
- Standard branching logic
- Core test types (visual, spark, fuel, compression)

Locked Capabilities

- Known failure pattern injection ✖
- Intermittent fault strategy ✖
- Advanced scan data interpretation ✖
- Euro intelligence ✖
- Time optimization bias ✖ (runs neutral)

Positioning

“Structured diagnostics for everyday repairs”

TIER STRUCTURE (REFINED)

PROFESSIONAL SHOP PLAN

Adds faster diagnostic paths, guidance on known failure patterns, advanced branching, and support for scan data. Designed to reduce diagnostic time, improve accuracy, and minimize comebacks.

(\$159 / \$129 annual)

Everything in Basic +

Enabled Upgrades

- Known Failure Pattern Injection 
 - Time-to-Diagnosis Optimization 
 - Advanced branching logic (load, temp, RPM) 
 - Electrical depth (voltage drop, signal testing) 
 - Scan data validation (basic interpretation) 
-

Still Locked

- Intermittent fault intelligence 
 - Euro-specific logic 
 - Deep control module strategy 
-

Positioning

“Faster diagnostics. Fewer comebacks.”

TIER STRUCTURE (REFINED)

EUROPEAN SPECIALIST PLAN

Includes advanced diagnostics for European vehicles, intermittent faults, control-module issues, and no-code conditions. Built for shops handling complex jobs that are often misdiagnosed.

(\$219 / \$179 annual)

 **Everything in Pro +**

 **Advanced Intelligence Layer**

- European Vehicle Mode 
 - BMW
 - Mercedes-Benz
 - Audi
 - Volkswagen
 - Porsche
- Intermittent Fault Handling Engine 
- Control module diagnostic strategy 
- Hidden fault detection logic (no-code scenarios) 
- Deep scan data interpretation 
- Known weak-point prioritization (timing chain, carbon, PCV, etc.) 

 **Positioning**

“Handles the jobs other shops misdiagnose.”
